

The screenshot shows the UXPressia interface with a dark theme. At the top, there are navigation icons for UNDO, REDO, SHARE, COPY, PRESENT, EXPORT, COMMENTS, FONT, and HISTORY, along with an UPGRADE button. On the left sidebar, under 'PERSONAS (1)', there is a card for 'Fahad Al-Mutairi, The Responsible Provider' with an 'AI-generated' tag. Below this is a 'ADD PERSONA' button. The main workspace displays a persona card for 'Fahad Al-Mutairi, The Responsible Provider'. The card includes sections for 'PERSONA DESCRIPTION', 'GOALS', 'SCOPE SUMMARY', 'LEGEND', and 'MARKET SIZE' (0%). There are also '+ ADD METRICS' and '+ ADD SECTION' buttons. A large 'Add Personality' button is visible on the right side of the card.

This screenshot shows the same workspace as above, but the persona card has been modified. The 'PERSONA DESCRIPTION' section is now at the top, followed by 'NAME' (Fahad Al-Mutairi, The Responsible Provider), 'MARKET SIZE' (0%), and 'TYPE' (Add Personality). The 'Goals' section is present but lacks descriptive text. The '+ ADD METRICS' and '+ ADD SECTION' buttons are still available.

## 1.1 Persona Name

### Purpose:

Identifies the persona uniquely within a workspace/project.

### Field Type:

- Text (editable inline)

#### **Behavior:**

- Editable on click
- Supports manual entry or AI-based name generation
- Updates instantly across navigation panels

### **1.2 Persona Tag / Label**

#### **Example:**

The Responsible Provider

#### **Purpose:**

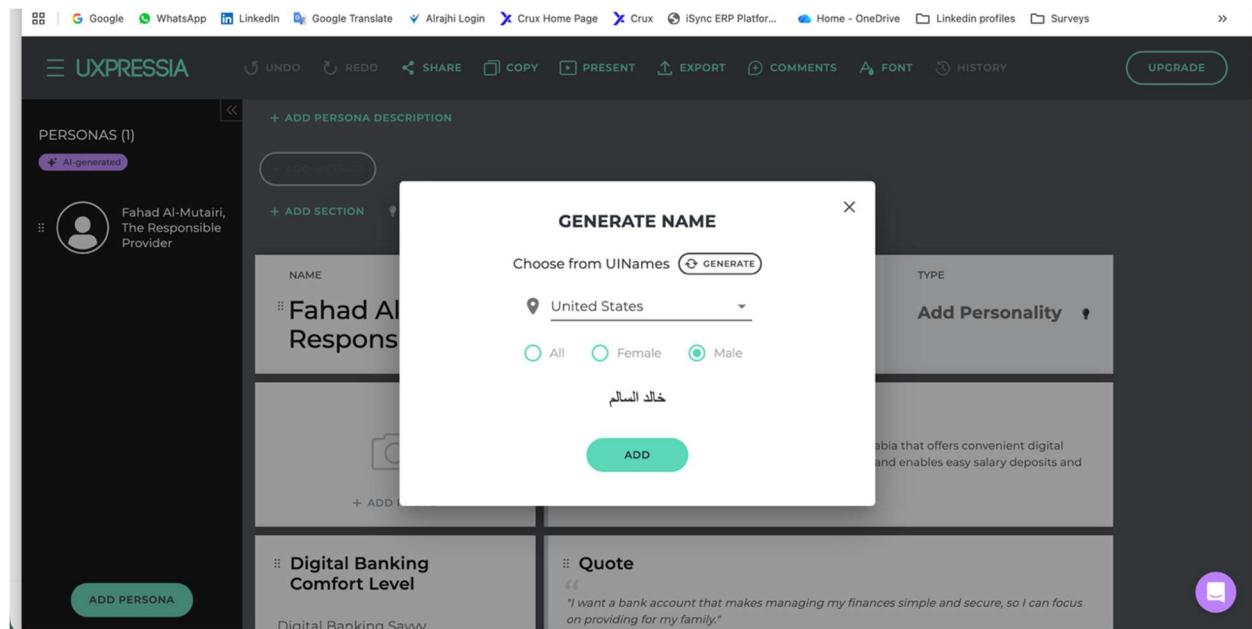

Summarizes the persona archetype or behavioral role.

#### **Field Type:**

- Short text / subtitle

#### **Usage:**

- Used for segmentation, filtering, and storytelling
- Displayed alongside persona name

#### **Optional Controls:**

- Regenerate name (AI)
- Localization support (e.g., Arabic names)

The screenshot shows the UXPressia platform interface for creating personas. At the top, there's a navigation bar with various icons and links. Below it, the main workspace is titled "UXPRESSIA". On the left, a sidebar lists "PERSONAS (1)" with an "AI-generated" entry and a profile icon for "Fahad Al-Mutairi, The Responsible Provider". A green button at the bottom of the sidebar says "ADD PERSONA". The main area displays the persona details:

- NAME:** Fahad Al-Mutairi, The Responsible Provider
- MARKET SIZE:** 0 % (represented by a circular progress indicator)
- TYPE:** Add Personality
- Goals:** To open a reliable and secure bank account in Saudi Arabia that offers convenient digital banking services, supports his family's financial needs, and enables easy salary deposits and bill payments.
- Digital Banking Comfort Level:** Digital Banking Savvy
- Quote:** "I want a bank account that makes managing my finances simple and secure, so I can focus on providing for my family."

### 1.3 Market Size (%)

#### Purpose:

Represents estimated proportion of users/customers that this persona represents.

#### Field Type:

- Numeric percentage (0–100%)

#### Behavior:

- Optional field
- Tooltip guidance ("Enter a number to show market size")
- Visualized as a circular progress indicator

The screenshot shows the UXPressia platform's persona creation interface. On the left, a sidebar lists 'PERSONAS (1)' with an AI-generated persona named 'Fahad Al-Mutairi, The Responsible Provider'. The main workspace displays this persona's details. At the top, there are buttons for UNDO, REDO, SHARE, COPY, PRESENT, EXPORT, COMMENTS, FONT, and HISTORY, along with an UPGRADE button. The persona card includes fields for NAME ('Fahad Al-Mutairi, The Responsible Provider'), MARKET SIZE (0%), and TYPE ('Add Person'). Below the card are sections for '+ ADD PERSONA DESCRIPTION', '+ ADD METRICS', and '+ ADD SECTION'. The 'Goals' section contains a placeholder image for a photo and a quote: 'To open a reliable and secure bank account in Saudi Arabia that offers convenient digital banking services, supports his family's financial needs, and enables easy salary deposits and bill payments.' The 'Quote' section contains a quote from Fahad: 'I want a bank account that makes managing my finances simple and secure, so I can focus on providing for my family.'

This screenshot shows the 'PERSONALITY / TYPE' dialog box overlaid on the UXPressia interface. The dialog box has fields for 'Persona Type' and 'Description'. It also features a 'Choose from personality types:' section with four categories: 'quick' (Rational, Artisan), 'logical/competitive' (Guardian), 'deliberate' (Idealist), and 'emotional/humanistic'. A 'DONE' button is at the bottom right. The background shows the same persona card and sidebar as the previous screenshot.

## 1.4 Persona Type / Personality

### Purpose:

Classifies persona based on behavioral decision style.

### Options (example taxonomy):

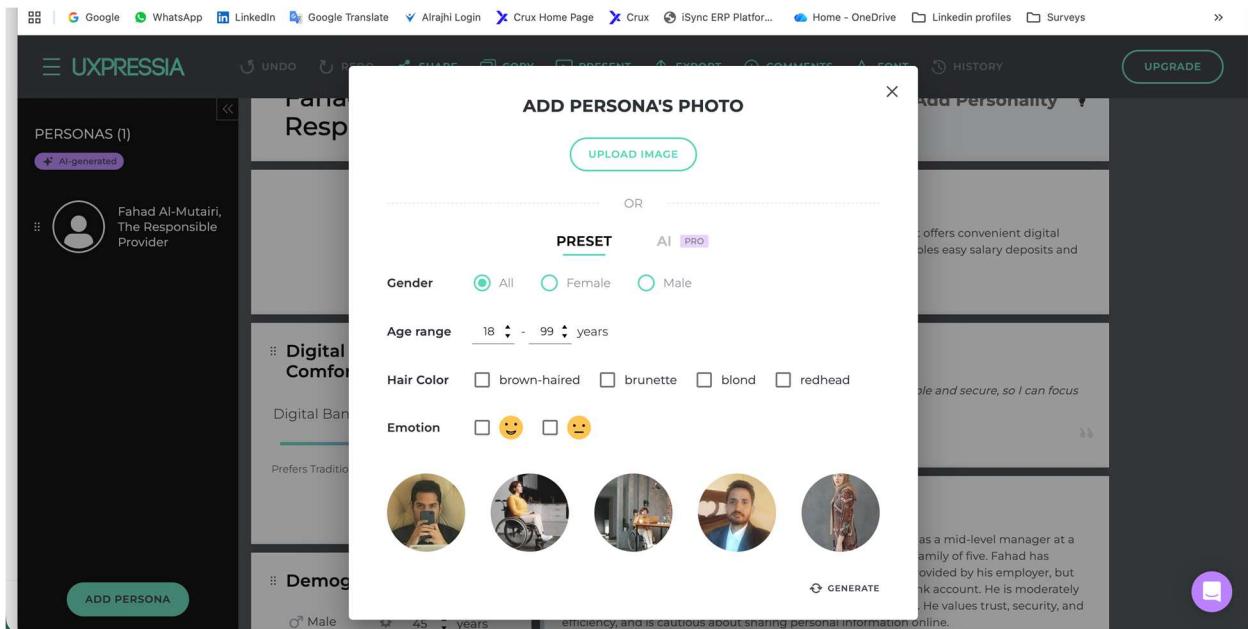

- Rational
- Guardian
- Artisan
- Idealist

### Field Type:

- Single-select predefined categories
- Optional custom text + description

### Usage:

- Used by UX, product, and CX teams to infer decision-making patterns

## 2. Persona Visual Identity

### 2.1 Persona Photo

#### Purpose:

Humanizes the persona visually.

#### Input Options:

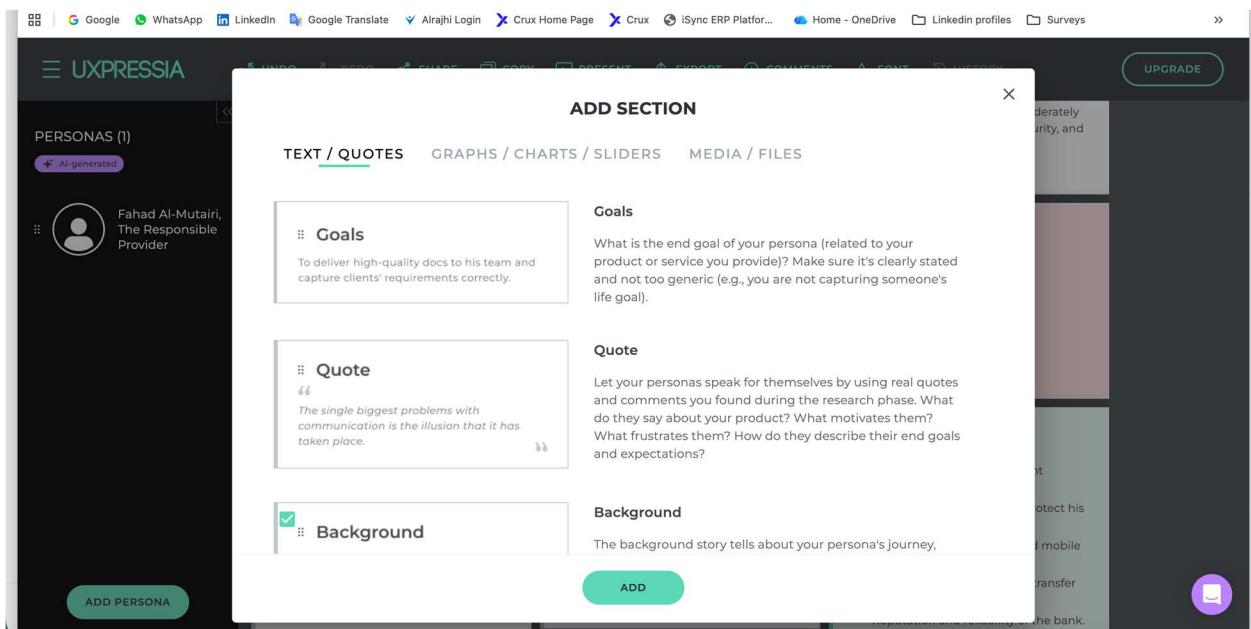

- Upload custom image
- Choose from preset stock avatars
- AI-generated avatar (optional)

## Controls:

- Gender filter
- Age range
- Emotion (neutral / happy / serious)
- Regenerate avatar

## Validation:

- Image size & format constraints
- Non-identifiable, representative imagery only

**Background**

Matthew is a technical writer in a software company. He has been working there for a while, and he really likes his job. Most of the time he works at the office, but sometimes he proceeds at home. Matthew often has to work overtime and during weekends. Once a month, he goes on business trips to customers' location.

**Frustrations**

- Missing out notifications about the changes made in the docs
- Docs accidentally deleted by any other collaborators
- Being unaware of the required changes in the documents

**Frustrations**

What can ruin your persona's experience and prevent them from using your product? Look for pain points. What takes too much time, discourages or prevents the persona from reaching their goals?

Same as motivations, these facts should lead to insights about your product.

**Motivations**

- Easy way to collaborate with colleagues
- Remote access to his workplace at any time
- Being aware of all the changes made in the documents

**Motivations**

What drives your persona and motivates them to start or/and continue using your service? Think of all the things that can increase user efficiency, effectiveness, and satisfaction. Each motivation in this block should bring some insights into how you can improve your product/service.

**Touchpoints BUSINESS**

Getting help X Asking question X  
Watching vlogs X Playing game X  
Signing up X Searching for item X

Touchpoints are points of interaction between your company and a customer involving a specific human need at a specific moment in time. They are opportunities to strengthen the relationship with your customer.

**Needs**

Needs are complementary to persona goals. While the latter

ADD

The screenshot shows the UXPRESSIA platform's persona creation interface. A modal window titled "ADD SECTION" is open, specifically for the "NEEDS" category under the "TEXT / QUOTES" tab. The modal contains a list of bullet points:

- Deliver high-quality documentation to the team in a timely manner
- Decrease the time spent editing docs
- Be able to make small changes using his smartphone

Below this, there are sections for "Expectations" and "Challenges". The "Expectations" section contains the text: "I'll easily integrate this tool with the task-tracking tools my team is already using". The "Challenges" section contains the text: "When on a business trip, Matthew doesn't always have a stable internet connection or a". A green "ADD" button is located at the bottom right of the modal.

On the left sidebar, there is a list of "PERSONAS (1)" with one item: "Fahad Al-Mutairi, The Responsible Provider". A teal "ADD PERSONA" button is at the bottom of the sidebar. The top navigation bar includes icons for Undo, Redo, Share, Copy, Paste, Export, Comments, Font, and Upgrade.

This screenshot shows the same UXPRESSIA interface, but the "ADD SECTION" dialog is now open for the "Previous experience" category under the "TEXT / QUOTES" tab. The modal contains the text: "Matthew is used to working with the Confluence + Jira combination."

Below this, there are three sections: "Context/environment", "Scenarios", and "Scenarios". The "Context/environment" section contains the text: "Matthew is at home, working on his MacBook. His wife is waiting for him to finish his work." The "Scenarios" section contains the text: "It's half past 8 pm. Matthew is already at home, but he needs to make some urgent changes in the doc based on the team". A green "ADD" button is located at the bottom right of the modal.

The left sidebar and top navigation bar are identical to the first screenshot, showing "PERSONAS (1)" with "Fahad Al-Mutairi, The Responsible Provider" and a teal "ADD PERSONA" button.

**Chart**

A chart section showing two bar charts and one pie chart. The bar charts compare values across three categories (blue, green, red) with approximate values of 90, 80, and 60 respectively. The pie chart shows proportions for four categories (red, blue, yellow, green) with approximate values of 30%, 40%, 20%, and 10%.

**ADD**

The screenshot shows the UXPressia platform's persona creation interface. On the left, there's a sidebar with a user profile for 'Fahad Al-Mutairi, The Responsible Provider'. The main area displays a 'PERSONAS (1)' card. A central modal window titled 'ADD SECTION' is open, showing three tabs: 'TEXT / QUOTES', 'GRAPHS / CHARTS / SLIDERS' (which is selected), and 'MEDIA / FILES'. The 'GRAPHS / CHARTS / SLIDERS' tab contains sections for 'Technology', 'Browsers', and 'Channels'. The 'Technology' section is highlighted with a green border and includes icons for various devices. Below each section is a brief description and an 'ADD' button.

This screenshot shows the same 'ADD SECTION' modal, but the 'MEDIA / FILES' tab is selected. It features a section titled 'Image section' with a placeholder for an image icon. Below it are sections for 'Customer satisfaction report' (with a document icon) and 'Metrics' (with two circular gauge charts for NPS and CSAT). Each section has a brief description and an 'ADD' button.

### 3. Add Section

#### 1. Purpose of the “Add Section” Feature

The **Add Section** feature allows users to **extend a customer persona** by adding structured or unstructured information blocks.

Each section represents a **specific dimension of customer understanding**, such as motivations, frustrations, context, skills, technology usage, or supporting media.

The system is designed to be:

- Modular
- Flexible
- Reusable across personas
- Non-restrictive (users choose only what's relevant)

## 2. Add Section Modal – General Behavior

### Entry Point

- User clicks “**+ Add Section**” within a persona canvas.

### Modal Layout

- Modal overlay opens above the persona canvas.
- Title: **ADD SECTION**
- Close icon available (top-right).

### Section Categories (Tabs)

1. **Text / Quotes**
2. **Graphs / Charts / Sliders**
3. **Media / Files**

Each tab displays a **list of available section templates** with:

- A preview card (visual sample)
- A short explanatory description

### Primary Action

- **ADD button**  
Adds the selected section to the persona canvas.

## 3. TEXT / QUOTES Sections

These sections capture **qualitative persona insights**.

### Background

#### What it captures

- The persona's life, work, and personal journey relevant to the product or service.

#### **How it's used**

- Builds empathy
- Provides context for decision-making

#### **Content style**

- Narrative paragraph
- Focused only on relevant details

#### **Frustrations**

#### **What it captures**

- Pain points and irritations that negatively affect the persona's experience.

#### **Format**

- Bullet points

#### **Usage**

- Identifies UX, service, or process gaps
- Direct input for improvement opportunities

#### **Motivations**

#### **What it captures**

- Factors that encourage adoption or continued usage.

#### **Format**

- Bullet points

#### **Usage**

- Helps teams understand what to emphasize in design, messaging, and features

## **Needs**

### **What it captures**

- Concrete requirements the persona needs to achieve goals.

### **Difference from goals**

- Goals = high-level outcomes
- Needs = practical requirements

### **Format**

- Bullet points or short text

## **Expectations**

### **What it captures**

- Baseline assumptions the persona has before using the product.

### **Examples**

- Ease of integration
- Speed
- Reliability

### **Format**

- Short paragraph

## **Challenges**

### **What it captures**

- Practical or situational obstacles faced by the persona.

### **Difference from frustrations**

- Frustrations are emotional
- Challenges are operational or contextual

## **Previous Experience**

### **What it captures**

- Tools, platforms, or services the persona has already used.

### **Purpose**

- Sets benchmarks and expectations
- Helps identify familiarity and learning curve

## **Context / Environment**

### **What it captures**

- The physical or situational environment in which interaction occurs.

### **Examples**

- At home
- At work
- On the move
- Limited internet access

### **Usage**

- Informs UX decisions and feature prioritization

## **Scenarios**

### **What it captures**

- A realistic, end-to-end story of how the persona interacts with the product.

### **Focus**

- Actions
- Motivations
- External constraints
- Reactions

### **Note**

- Avoids technical UI steps
- Focuses on human behavior

## **Text Section (Generic)**

### **What it captures**

- Any information not covered by predefined sections.

### **Flexibility**

- User-defined title
- Free-form content

## **Demographic**

### **What it captures**

- Structured factual attributes.

### **Typical fields**

- Gender
- Age
- Location
- Marital status
- Occupation
- Income band

### **Notes**

- All fields are optional
- Custom fields allowed
- Should be research-driven, not assumed

## **4. GRAPHS / CHARTS / SLIDERS**

These sections visualize **quantitative or comparative information**.

## **Skills**

### **What it captures**

- Proficiency levels across specific skills or competencies.

## **Visualization**

- Sliders on a 0–100 scale

## **Usage**

- Highlights differences between personas
- Guides complexity and onboarding decisions

## **Charts**

### **What it captures**

- Distribution or comparison of persona attributes.

## **Supported visuals**

- Bar charts
- Pie charts

## **Usage**

- Makes persona data easier to interpret and remember

## **Technology**

### **What it captures**

- Devices and platforms used by the persona.

## **Visual style**

- Icon-based selection

## **Examples**

- Smartphone

- Laptop
- Operating system preference

### **Usage**

- Informs device-first or platform-first design decisions

### **Browsers**

#### **What it captures**

- Browsers commonly used by the persona.

### **Usage**

- Helps with web optimization and compatibility decisions

### **Channels**

#### **What it captures**

- Preferred communication and interaction channels.

### **Examples**

- Email
- WhatsApp
- Website
- Mobile app
- In-person

### **Usage**

- Marketing and CX planning

## **5. MEDIA / FILES**

These sections attach **supporting evidence and artifacts**.

## **Image Section**

### **What it captures**

- Visual references related to the persona or journey.

### **Examples**

- Screenshots
- Journey snapshots
- Reference images

### **Usage**

- Adds visual clarity
- Supports storytelling

## **Document Section**

### **What it captures**

- Research or reference documents.

### **Examples**

- Survey reports
- Analytics files
- PDFs

### **Purpose**

- Keeps persona insights and evidence in one place

## **Metrics (Business Feature)**

### **What it captures**

- Quantitative performance or experience metrics.

### **Examples**

- NPS
- CSAT

- CES

#### **Usage**

- Links persona insights with real performance data

### **6. Section-Level Behaviors (Global)**

Each section supports:

- Drag-and-drop reordering
- Inline editing
- Deletion
- Duplication
- Optional visibility based on subscription level

### **7. Design Philosophy Behind the System**

- Personas are **not rigid templates**
- Users choose **only what is relevant**
- Sections encourage **thinking**, not form-filling
- Platform supports **UX, CX, product, and business teams equally**
